

STORAX

Drive-in Racking

Versatile, high-density pallet storage

SP80 Drive-in Racking

Designed around Storax SP80 pallet racking, **SP80 Drive-in** utilises a bespoke range of additional parts in conjunction with SP80 racking uprights and bracing, in a simple bolted construction.

The specially formed beam rail serves as the pallet guide and also as the pallet storage rail, thereby keeping the number of different components to a minimum, while the integral floor-mounted truck guide rail is provided complete with a custom-made upright protector.

Access to pallets is possible from either end of the rack, providing drive-through as well as drive-in capability.

Details that count

All components are designed and made in our own factory. This means that manufacturing quality and lead time consistency are guaranteed.

Both **Storax Drive-in** systems are available in a choice of two beam rail sizes which can accommodate standard-sized pallets or pallets with overhanging loads.

The integral truck guide-rail system is offered in two duties, to suit the type of operation and the design of truck being used.

rough racking for high-density pallet storage

High-Bay Drive-in Racking

The **Storax High-Bay Drive-in** system is ideal when vertical height is able to be exploited. It can be supplied and loaded up to 12 metres high, by virtue of its bespoke 'T' section upright and tie bracing arrangement.

Storax High-Bay Drive-in uses the same specially-formed beam rail as **SP80 Drive-in**, which can be used both as the pallet guide and as the pallet storage rail.

As with **SP80 Drive-in**, pallets can be accessed from either end of the rack, to provide Drive-through as well as Drive-in capability.

For **'first-in, last-out'** storage applications, the density of storage achieved with Drive-in racking systems and the consequent reduction of the floor area required can produce significant savings on associated running costs (eg heating, lighting, rent and rates).

Fully tested to meet all standards

Our factory has full metallurgical and structural testing facilities. This ensures that **Storax Drive-in racking** systems are manufactured to the highest standards and continue to meet both UK and European design requirements.

At Storax we strive to combine quality products with quality service. To improve and maintain our standards, Storax is a member of both SEMA and SHEDA in the UK, and FEM in Europe, where we take an active part in the compilation of new European standards for racking products.

STORAX

Experience in store

A subsidiary of F Ramada of Portugal – Storax Racking Supplies was formed in 2003 to supply a wide range of Ramada products, solely through trade outlets in the UK and elsewhere in Europe.

The founding members of Storax Racking Supplies are all ex-employees of Dexion Ltd. Collectively we offer more than 100 years' experience of the industrial storage sector. Having worked in different areas of the business, our varied knowledge and experience enable our team to provide accurate product information, technical design advice, a prompt and efficient order-processing service and reliable customer support from the quotation stage to completion of every order. Our warehouse staff pride themselves on their excellent record for accurate picking and clear, careful packing.

Working out of our Hertfordshire office and warehouse north of London, we continuously adapt our product offering and services to respond to the changing needs of our customers. We can offer a wide range of racking, shelving and associated accessories from stock, and a made-to-order service from the factory in Portugal for non-standard sizes and colours.

SP80 Racking

Dynamic Racking

Drive-in Racking

Cantilever Racking

IM50 Shelving

Slotted Angle

Storax SP80 can be used in its own right to provide tailor-made racking solutions, and can also provide a framework for other methods of pallet storage, including Drive-In, Push Back Rack, Dynamic and Mobile Storage Systems.

Storax Cantilever racking is the ideal product when long lengths need to be stored.

Storax IM50 is one of Europe's favourite bolt-free hand-loaded shelving systems. A range of accessories adds to this popular product's versatility and makes it a logical choice for many industrial and semi-commercial applications.

Storax Slotted Angles are still faithful to the original Dexion designs and, used in conjunction with the normal range of accessories, remain as flexible in their applications today as they have always been.
